

ROUND MAX EMERGENCY HARSH SERIES

LED LIGHTING FOR HARSH AREA & FLOOD

Reliable. Durable. Efficient.
6,000 to 29,000 lumen models

RED SKY
SERIOUSLY SAFE LIGHTS™

ABOUT RED SKY LIGHTING

PIONEERING INDUSTRIAL ILLUMINATION FOR HARSH & HAZARDOUS CONDITIONS

- A leading manufacturer of premium LED lights for demanding work conditions
- Headquartered in California, products assembled in the USA
- Servicing global clients across four continents in metal processing, oil & gas, marine, manufacturing
- Renowned for quality, dependability, client care, and uncompromising safety standards

WHY CHOOSE RED SKY

⚡ SERIOUSLY SAFE LIGHTS

- Rigorously tested in our professional labs
- Surpassing industry certifications and safety protocols
- Crafted with highest grade components for maximum durability

⚡ TOP-NOTCH SERVICES

- Team of experts for seamless support
- Energy audit services, lighting simulation services
- Hassle-free return policy and management

⚡ FAST DELIVERY

- Majority of orders delivered within 14 days
- Same day shipping for products in stock
- Real-time order tracking for full transparency

⚡ SUSTAINABLE SOLUTIONS

- High luminous efficacy LEDs for energy savings
- Conscious product design
- Recyclable materials for products and packaging

ROUND MAX EMERGENCY SERIES

The ROUND MAX EMERGENCY HARSH SERIES (RDX EM) is a UL 924-certified LED lighting solution engineered for harsh and hazardous environments—where safety and performance can't be compromised. Delivering 6,000-29,000 lumens with up to 150 lm/W, the RDX EM ensures dependable, energy-efficient illumination during both regular operation and power loss.

Its integrated LiFePO₄ battery provides 3,000 lm for 90 minutes or 1,500 lm for 180 minutes, maintaining visibility and enabling safe evacuation during critical moments. Designed with marine-grade aluminum, NEMA 4X, IP66 / 67 and IK10 protection, and 3G vibration resistance, it thrives in explosive, high-vibration, and chemically demanding environments.

With an L70 lifetime exceeding 102,000 hours at 140°F (60 °C), the RDX EM is built for long-term durability in the most extreme industrial conditions. Five beam options (type I, III, V, 30°, and 60°) and multiple mounting configurations—Pendant, Ceiling, Yoke, Wall, Stanchion slip fitter, Stanchion, Pole, or Junction Box—make installation flexible and maintenance simple.

Ideal for oil & gas, chemical plants, marine terminals, and industrial hazardous sites, the RDX EM delivers seriously safe, reliable illumination when visibility and safety matter most.

ROUND MAX EMERGENCY HARSH SERIES

ALCOHOL FACTORY, KENTUCKY

FEATURES

Built for the Toughest Conditions

NEMA 4X, IP66 / 67, IK10, and 3G vibration rated, the RDX EM withstands explosive gases, dust, and extreme environments with unwavering reliability.

Reliable Emergency Protection

UL 924-certified for emergency lighting, the RDX EM features a LiFePO₄ battery system delivering 3,000 lm for 90 minutes or 1,500 lm for 180 minutes, keeping workers safe when the power goes out.

Adaptable to Every Application

With five beam options and eight mounting configurations, the RDX EM provides versatile lighting for oil & gas, chemical, and industrial facilities.

* Value calculated based on 5000K and CRI80 and Clear glass ,varies to different spec.

** Yoke Mount Only

ORDERING INFORMATION

EXAMPLE: RDX-9L-100-277-5K-T5-HS-CG-GRY-PDCG-EM01

* T1, T3, 30°, 60°, only available with Clear Glass & Clear PC.

** CRI 90, expect longer lead time.

*** No accessory required for Pendant & Ceiling Mount

**** YOKE factory pre-installed, no additional accessory order required.

ORDERING INFORMATION (JUNCTION BOX MODELS)

EXAMPLE: RDX-9L-100-277-5K-T5-H3-CG-GRY-JB01-EM01

* T1, T3, 30°, 60°, only available with Clear Glass & Clear PC.

** CRI 90, expect longer lead time.

*** JB01: 1.5 inch (1.9 inch OD) and 2 inch (2-3/8 inch OD) NPT Threaded Slip-Fit Junction Box

JB02-P: 1.5 inch (1.9 inch OD) and 2 inch (2-3/8 inch OD) NPT Threaded Slip-Fit Junction Box + Sensor (120V)

JB03-P: 1.5 inch (1.9 inch OD) and 2 inch (2-3/8 inch OD) NPT Threaded Slip-Fit Junction Box + Sensor (208-277V)

JB04: 1.5 inch (1.9 inch OD) and 2 inch (2-3/8 inch OD) Non-Threaded Slip-Fit Junction Box

JB05-P: 1.5 inch (1.9 inch OD) and 2 inch (2-3/8 inch OD) Non-Threaded Slip-Fit Junction Box + Sensor (120V)

JB06-P: 1.5 inch (1.9 inch OD) and 2 inch (2-3/8 inch OD) Non-Threaded Slip-Fit Junction Box + Sensor (208-277V)

100-277 VAC for JB01 and JB04.

120 VAC only for JB02-P and JB05-P.

208-277 VAC only for JB03-P and JB06-P.

MOUNTING ACCESSORIES

SLIP-FIT JUNCTION BOX

The **Junction Box** is a multi-piece assembly featuring a copper-free, cast-aluminum housing, front cover, and cable gland. The design accommodates both stanchion installation and other mounting options. It is compatible with 2" (2 3/8" OD) and 1.5" (1.9" OD) poles, both NPT-threaded and non-threaded.

FEATURES

- Weather-resistant finish suitable for wet locations and marine environments
- WAGO 211 lever connectors (5-pole, UL/CSA, 18-12 AWG) for easy, hassle-free wiring
- Wiring access cover with captive screws and a rear hub featuring NPT 1/2" threads for daisy-chain wiring
- Optional C1D2 Photocell Sensor built-in
- Ambient temperature range: 32°F ~140°F (0°C ~ +60°C) for 5L / 7L / 9L / 12L / 18L / 22L , 32°F ~ +131°F (0 ~ +55°C) for 28L
- Shock and vibration-resistant design

Note: LXX# = nominal lumens. Verify lumen package before ordering.

A DIRECT RETROFIT FROM HID TO LED

The RDX EM series LED is easy to retrofit in the same configuration as your existing HID luminaires. For example, a 200-watt Round Max (RDX-28L-EM) delivers virtually the same illumination as its equivalent 750-watt Metal Halide luminaire while providing an 80% reduction in energy costs and up to 145,000 hours of continuous

MODELS	Lumen Output (Lm)	MH Equivalent (W)	HPS Equivalent (W)
RDX-5L-EM	6,039	150	150
RDX-7L-EM	7,580	175	225
RDX-9L-EM	9,873	200	250
RDX-12L-EM	12,957	300	360
RDX-18L-EM	19,714	450	400
RDX-22L-EM	23,551	450	600
RDX-28L-EM	28,654	750	600

THE RIGHT BEAM PATTERN FOR YOUR APPLICATION

RSL optic package is engineered to deliver maximum footcandles efficiently where you need them, without wasted light or overspill.

RSL offers complimentary lighting design services for our products using industry-leading AGI32 software, tailored for projects of all sizes in harsh and hazardous locations. We assist you in determining the number of fixtures needed, the types of lights to use, their optimal placement, and how to maximize energy savings—all within budget.

Simply fill out the form (<https://www.redskylighting.com/lighting-design>) with a few key details, request a layout, and we'll bring your ideas to life within 2-5 business days.

Beam	NEMA/IESNA Type	Beam Description	Beam Projection Distance
30°	NEMA 3	Medium Narrow	
60°	NEMA 4	Medium	
90°	NEMA 5	Medium Wide	
120°	NEMA 6	Wide	
T1	Type I	Asymmetric distributions, well suited for narrow areas, such as Conveyor belts, Aisleways, Catwalks, Loading docks and Tunnels.	
T2	Type II	Asymmetric distributions, well suited for narrow areas, such as roadways, paths and driveways.	
T3	Type III	Asymmetric distributions, well suited for site / area perimeters, wide roadways, and open areas.	
T5	NEMA 7 Type V (Square)	Very Wide: symmetrical pattern with excellent uniformity for large, open areas.

EMERGENCY TEST FUNCTION

Self-Testing function

The luminaire incorporates a Self-Testing feature that performs a 3-minute monthly self-test every 30 days and a 30-minute annual self-test every 12 months.

During the self-test, the luminaire switches the luminaire to emergency mode and reduces its light output to the emergency level. The test assesses whether the emergency function is operating reliably; if a fault is detected, it is signaled by distinct indicator states, allowing maintenance personnel to identify the fault promptly.

The indicator states are as follows:

INDICATOR	STATUS
Green on	Battery full
Green slow flashing (3s ON / 3s OFF)	Battery charging
Red on	Discharging
Red slow flashing (3s ON / 3s OFF)	Self-testing process
Red / Green fast flashing (1s Red / 1s Green)	Fault
Red fast flashing (1s ON / 1s OFF)	Load fault (Vlamp out of range)
Red flashing (1s ON / 5s OFF)	Charger fault
Red flashing (5s ON / 1s OFF)	Battery fault

Test button function

Maintenance engineers can also use the Test Button to manually enter Test, Monthly Test, or Annual Test mode. Which mode is activated depends on the duration the Test Button is held; the operating instructions for the Test Button are as follows.

EMERGENCY TEST FUNCTION

- a) Test Button press time $t < 5$ s: enters Test mode; Test mode is exited as soon as the button is released.
- b) Test Button press time $5 \text{ s} < t < 10$ s: enters Monthly Test mode. Once the manual monthly test has started, the complete monthly-test sequence will run to the end and the monthly-test counter will increment by 1. If the button is pressed again while the sequence is running, the monthly test aborts and the counter is not incremented.
- c) Test Button press time $t > 10$ s: enters Annual Test mode. Once the annual test has started, the entire annual-test sequence will finish and the unit will then return to the state of the first monthly test. If the button is pressed while the annual test is running, the annual test aborts and the system waits for the next scheduled annual test.

During the test, if a fault is detected, it will be indicated by the same distinct indicator states described in the Self-Testing section.

The RDX-EM series shipped by RSL to customers is supplied as standard with a test-button (push-button) & Panel. This button & Panel are packed loose in the accessory bag and is not pre-installed inside the luminaire. The installation instructions clearly state that the test button may be used only in non-hazardous areas; its appearance is shown in the photo.

Note: If the installer uses the Test Button supplied with the luminaire accessories, the button must be routed to a Non-Hazardous Area. Use 2*20 AWG or thicker cable; the maximum lead length is 328 ft (100 m). The cable needs to be provided by the customer additionally.

The panel is ETL- or UL-listed; dimensions are as shown in the figure above and comply with current mainstream panel standards.

HAZARDOUS LOCATION LIGHTING BASICS

Atmosphere Groups

Temperature Classification

Substance	Hazard Class	Division Groups	Zone Groups	Max. Surface Temperatures	NEC®500 CEC®	NEC®500/IEC-Group II
Acetylene	Class I Flammable Gases	Group A	IIC	450°C(842°F)	T1	T1
Hydrogen		Group B	IIC	300°C(572°F)	T2	
Ethylene		Group C	IIB	280°C(536°F)	T2A	T2
Propane		Group D	IIA	260°C(500°F)	T2B	
Methane		Group D	IIA ²	230°C(446°F)	T2C	
Combustible Metal Dusts	Class II Combustible Dusts	Group E ¹	IIIC ³	215°C(419°F)	T2D	
Combustible Carbonaceous Dust		Group F	IIIB ³	200°C(392°F)	T3	
Combustible Dusts not in Group E or F (Flour, Grain, Wood, Plastics, Chemicals)		Group G	IIIB ³	180°C(256°F)	T3A	
				165°C(329°F)	T3B	
Combustible Fibers and Flyings		Class III Fibers and Flyings	Not Applicable	IIIA ³	160°C(320°F)	T3C
Note 1: Group E is applicable to Class II, Division 1 only. Note 2: Methane is a Group IIA Gas for non-mining applications. Note 3: Group IIIA, IIIB and IIIC have not been adopted by the Canadian Electrical Code.				135°C(275°F)	T4	
				120°C(248°F)	T4A	
				100°C(212°F)	T5	
				85°C(185°F)	T6	

Classification of Divisions and Zones

Hazard Level	Division Scheme	Zone Scheme	Definitions
Continuous Hazard	Division 1	Zone 0 / Zone 20	A place in which an explosive atmosphere is continually present
Intermittent Hazard		Zone 1 / Zone 21	A place in which an explosive atmosphere is likely to occur in normal operation
Hazard Under Abnormal Conditions	Division 2	Zone 2 / Zone 22	A place in which an explosive atmosphere is not likely to occur in normal operation, but may occur for short periods

IP Codes

1st No.	Solid Objects
0	No protection
1	Objects greater than 50mm
2	Objects greater than 12.5mm
3	Objects greater than 2.5mm
4	Objects greater than 1mm
5	Dust protected
6	Dust proof
2nd No.	Liquids
0	No protection
1	Vertically dripping
2	Dripping up to 15°
3	Limited spraying
4	Splashing from all directions
5	Hosing jets from all directions
6	Strong hosing jets from all directions
7	Temporary immersion
8	Continuous immersion
9	Steam-jet cleaning
